PROFESSIONAL SUMMARY

Senior Software Engineer with 3+ years of experience spanning backend development, desktop application development, and DevOps. Progressed from Python-based backend development to building cross-platform desktop applications with Electron.js and React.js, to now owning containerization, CI/CD pipelines, and production infrastructure. BSc (Hons) in Computer Science with Industrial Experience from the University of Westminster. Co-author of an IEEE-affiliated research paper on machine learning-based mental health risk detection.

EXPERIENCE

Rajida Holding (Pvt) Ltd - Senior Software Engineer (currently functioning as DevOps Engineer) *September 2021 – Present*

- Began as a backend developer building services with Python frameworks (FastAPI, Flask), later transitioning to desktop application development using Electron.js and React.js
- Currently responsible for containerizing and orchestrating full application stacks using Docker, managing production servers (Linux/Ubuntu), and administering databases (MongoDB, MariaDB)
- Design and maintain CI/CD pipelines using GitHub Actions to automate build, test, and deployment workflows
- Handle end-to-end production troubleshooting and problem-solving across the infrastructure and application stack
- Additional experience with Node.js and Spring Boot on select projects; hands-on exposure to Flutter for mobile development

EDUCATION

BSc (Hons) Computer Science with Industrial Experience - Upper Second Honours

September 2021 – June 2026

University of Westminster, in academic collaboration with Informatics Institute of Technology (IIT), Sri Lanka

PUBLICATIONS

"Adaptive Machine Learning System for Personalized Mental Health Risk Detection from Social Media". Co-authored with Prasandika Balage. Presented at the 18th ECAI 2026 International Conference (IEEE), Bucharest, Romania, July 2026.

PROJECTS

Adaptive ML System for Mental Health Risk Detection - Designed and built a machine learning system that personalizes mental health risk detection using social media data; work was peer-reviewed and presented at an IEEE-affiliated international conference.

TECHNICAL SKILLS

- Languages/Frameworks: Python (FastAPI, Flask), JavaScript (React.js, Electron.js, Node.js), Java (Spring Boot), Flutter
- DevOps/Infrastructure: Docker, GitHub Actions (CI/CD), Linux (Ubuntu), Production server management
- Databases: MongoDB, MariaDB
- Certifications: Python Essential Training, React.js Essential Training, Java Object-Oriented Programming (LinkedIn Learning)

LEADERSHIP / EXTRACURRICULAR

Vice President, Esports Club - Informatics Institute of Technology (IIT), Sri Lanka
